## An Introduction

Over the years the Restaurant Industry which is the part of Service Industry has seen a drastic change from manual process of order booking, bill making, stock managing to customer satisfaction on which the success of this industry relies upon.

Keeping in mind the above things Pelagian Software's "Compu Restaurant For Windows" come out with its customized and easy to use version well-suitable for Restaurant Industry. Software's KOT making feature helps you to prepare KOT in very minimal time and gives full freedom to edit it. In the case of multi-kitchen don't hassle about KOT Printing. They will be printed automatically according to the kitchens.

Our prudent thinking resulted the bill making screen so easy to use that even in the rush hours the counter person don't need to feel panic. Software has two kind of bill making option- Bill through KOT & Retail Billing. Choose the best one for your needs!

Managing the stock has become a "cakewalk" now for the users of this software. Our Inventory feature helps you to maintain and handle your inventory with ease. Through the use of this software the complete process of inventory control and management can be fully automated thus ensuring accuracy and efficiency to encourage you to take the precise decision of the back-office management. All the reports like raw material consumption, stock summary etc. are updated so smoothly that the result are eye-soothing!
